

# 61 Small Kitchen Design Ideas

## Keep Lighting Simple

A single statement pendant or a series of small, discrete fixtures can provide both function and style while maintaining visual clarity.

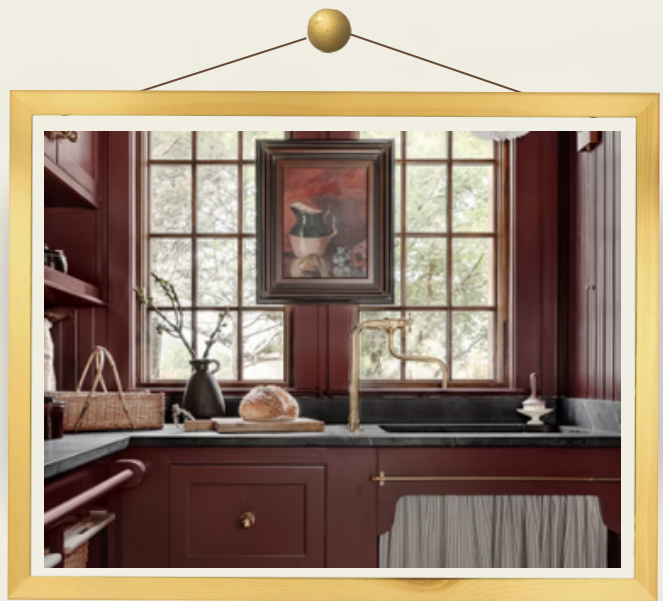

## Don't Be Afraid of Color

Nature-inspired colors, particularly greens and blues, create a fresh, inviting atmosphere.

## Try a Moody Color

Deep navy, forest green, or charcoal gray can create a sophisticated atmosphere that makes your kitchen feel more intentional and designed, rather than simply small.

## Roll in a Small Island

A rolling island provides additional counter space when needed but can be easily moved aside for larger gatherings or different activities. Look for options with built-in storage to maximize functionality.
